Social media platforms have become a hotly contested battleground for the best 'selfies'. The important thing for a good selfie is the right angle, and — of course — a striking piece or two of jewellery. The much-raved single or asymmetrical earring is one of celebrities' and trendsetters' favourites. These one-ear embellishments tend to be elaborate and sophisticated in design — often lining the entire ear to make a statement. Perfect for the mandatory 'in-the-car' selfies, the single earring draws attention to your eyes and jawline.

To give the look a semblance of symmetry, one can pair a single earring with a smaller, matching stud. The asymmetrical trend is all about bending the rules and experimenting with both new and existing pieces. But if you're still a little bit sceptical, ease into it with mismatched earrings — quirky, pretty, and certainly on point. 💎

For the most, few things kill a party mood faster than the sight of flat, ugly shoes. This holiday season, step up in the most coveted, glamorous

footwear: From sexy stilettos to slinky slingbacks, allow your feet to be the star of the night. For an evening of dancing, go for a sturdy pair with ankle straps for a more comfortable twirl. Block heels with pretty ribbons or delicate embellishments are a perfect choice. Quiet, romantic dinners call for a sexier, more studded option. Stilettos — whether satin, suede, or velvet, but always bejewelled — are the way to go. And if you're heading out straight from the office to a festive, all-nighter party, the reliable pump is your best bet. Now, to complement your primped up feet, make sure to sparkle with every subtle move with elegant statement jewels. After all, these are what holiday parties are for. 💎
